

ENERGYCONNECT

Employment

SecureEnergy is a Joint Venture between Clough and Elecnor, two global leaders with local knowledge in delivering Engineering, Procurement and Construction projects for the power infrastructure industry. SecureEnergy, on behalf of Transgrid, will build EnergyConnect, a 700km overhead electricity transmission line and one of the nation's largest energy infrastructure projects.

We predict that SecureEnergy for EnergyConnect will generate up to 1,500 jobs and contribute a further \$4 billion in economic activity for NSW. At peak workforce in mid-2023 there will be approximately 1,000 employees, with SecureEnergy recruiting and sourcing locally in the region to fill a number of these roles.

Local employment opportunities with EnergyConnect

EnergyConnect is an exciting project that will see significant employment in the Riverina and Murray regions for up to 2.5 years.

SecureEnergy is recruiting for a range of positions and skill levels for the delivery of the project and to support the workforce. These positions range from labourers and trades, to plant operators, construction engineers, among many more. When possible, SecureEnergy is filling these roles with local candidates as part of our commitment to support local communities.

We are committed to working collaboratively with all communities including local Indigenous people in providing employment, training and business opportunities.

How to become involved

Employment and recruitment will be a staged process, ongoing throughout the project. You can find the links to specific jobs for the project via the SecureEnergy website at www.secureenergyjv.com.au or directly on the Seek website at <https://www.seek.com.au> by using the search term "SecureEnergy".

Employment on EnergyConnect is with SecureEnergy and not with Transgrid.

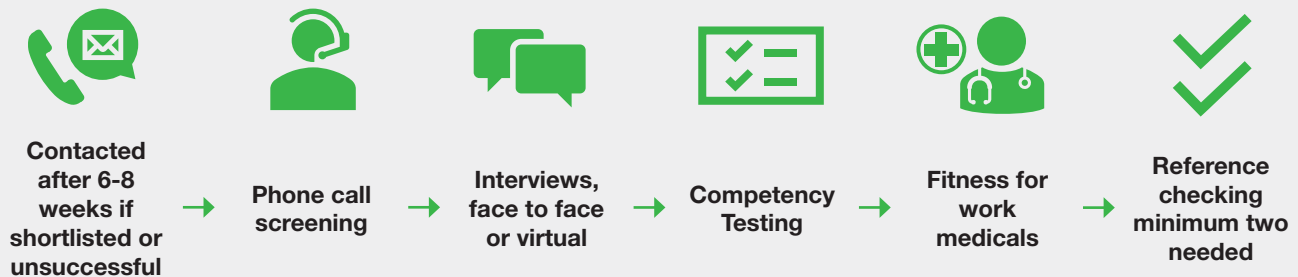

Transgrid has its own employment website <https://careers.transgrid.com.au> where you can find out about Transgrid's available roles.

Safety and SecureEnergy

Safety is SecureEnergy's highest priority. In delivering EnergyConnect, our objective is zero harm to people, environment and our community.

We are committed to further developing a safety culture that will be entrenched throughout construction and commissioning phases of the project. We are driven by a culture to take care of ourselves, each other, and our families. This extends to the culture in the camps and in the field where we will adhere strictly to NSW Government Health guidelines. We value and respect each worker, as well as our communities and stakeholders.

A selection procedure is in place to ensure the most suitable candidate is recruited for the role.

EnergyConnect Q & A

Q: Where will the workers live?

A: Accommodation camps will be established for the majority of workers, there will be six camps located around Wentworth, Buronga, Balranald, Hay, Jerilderie, and Lockhart. The camps are high quality facilities fitted to comfortably meet the needs of the workers. Amenities include gyms, BBQ areas, cafeterias, televisions, kitchens, streaming services, WIFI and more. Each camp houses between 100 and 400 employees.

Q: What will the working schedule look like?

A: This is dependent on the role and will be clarified through the recruitment process for that position. Most workers will operate on a scheduled roster.

Q: Do I need to be qualified to apply?

A: Some positions have requirements, such as licences, certificates, qualifications, or prior training. These requirements are outlined alongside the advertisement. There are also several roles that do not have any formal qualifications for applying.

Q: How will I hear about jobs being advertised?

A: You can find the links to specific jobs via the SecureEnergy website or directly on the Seek website at [https:// www.seek.com.au/](https://www.seek.com.au/). Keep in mind that this is a staged process that will continue until peak workforce in mid-2023. If there isn't a job listed now, then you should set up an alert.

Q: How do trained employees benefit after project completion?

A: We feel a great sense of responsibility towards the continued success of all our employees once the project they are working on is finished. We are committed to providing skills and opportunities that can be transitioned from the project to the local region and to build individual skills and capabilities up for their future endeavours.
