

ENERGYCONNECT

Business and Supply

SecureEnergy is a Joint Venture between Clough and Elecnor, two global leaders with local knowledge in delivering Engineering, Procurement and Construction projects for the power infrastructure industry. SecureEnergy, on behalf of Transgrid will build EnergyConnect, a 700km overhead electricity transmission line and one of the nation's largest energy infrastructure projects.

EnergyConnect will benefit local businesses

EnergyConnect is bringing many benefits to our local communities across the project area. These include; local employment, opportunities for local businesses and suppliers, improvements in local infrastructure and increased economic activity.

We are looking for various services and providers that will support the delivery of the project as well as the operational requirements of the accommodation camps and site offices. To date, more than 1,000 expressions of interest have already been registered and an estimated \$250 million of direct project expenditure will occur in Regional NSW. SecureEnergy is committed to providing continued opportunities to local business.

SecureEnergy is excited about working with local stakeholders, suppliers and workers in the delivery of a critical project and an emerging industry to support the change taking place in Australia's energy system.

Work with us

You can find available packages directly on the Industry Capability Network (ICN) website at <https://icn.org.au>.

Suppliers can find more information by going to the SecureEnergy website and accessing the Supplier Information Guide.

Suppliers will be able to access information about Transgrid and SEJV's obligations under the Australian Industry Participation Plans.

You can also find the link via the SecureEnergy website at www.secureenergyjv.com.au

You will need to register your business with ICN before applying. ICN is a business network that helps Australian companies grow, working with local suppliers and project managers to help save valuable time and money in the procurement process.

SecureEnergy, the principal contractor for EnergyConnect, is responsible for hiring the project's construction and services workforce.

Tender awarding process

Each tender will go through an awarding process, which includes; a Request for Information, Request for Quotation, Qualification, Negotiation, and a Contracting process. The timing for each award process differs, it may take several weeks or months depending on the package in question.
