

EnergyConnect

Community Update - Buronga camp demobilisation

June 2025

ElecNOR Australia (formerly SecureEnergy) has been contracted by Transgrid to deliver part of EnergyConnect with the construction of 700km of new power lines from the SA border to the regional energy hub of Wagga Wagga. The project will connect the electrical grids of New South Wales, South Australia, and Victoria, improving reliability of our nation's energy supply.

Construction update

The EnergyConnect project team are continuing to advance construction activities on the transmission line from Buronga to Dinawan near Bundure, NSW. As part of this work, ElecNOR is demobilising its accommodation camp and laydown at Buronga following the completion of the Western section of the project.

From early June 2025 until the end of July, the Buronga camp located on Arumpo Road will be demobilised. Additional beds have already been installed at the Dinawan camp near Bundure which will remain in place for the duration of the project.

Removal of accommodation buildings

Demobilising of the camp will include the following activities:

- Loading of temporary accommodation buildings by heavy vehicle and plant.
- Removal of lighting and utility services.
- Removal of IT and Communication equipment into the camp buildings and the associated connections between buildings.

Works outside approved construction hours

The approved standard hours for construction activity and laydown operations are:

- 7am to 6pm Monday to Friday
- 8am to 1pm Saturdays
- At no time on Sundays and NSW Public Holidays.

This activity is part of approved out of hours construction work to ensure works are carried out safely and to minimise disruption to the community. Demobilisation work at the camp and laydown will take place, weather permitting **Monday to Sunday 6am to 7pm (including Public Holidays)**

All work will be carried out in line with the project's Conditions of Approval and Construction Environmental Plan

How this could affect you?

Wentworth Shire Council

You can expect to see the transportation of accommodation units by heavy vehicle on Arumpo Road, Silver City Highway and Sturt Highway as these units are relocated to South Australia.

Motorists on Arumpo Road should be aware of heavy vehicles entering and exiting the camp access point and slow down to allow entry and exit of these vehicles.

Mildura Rural City Council

You can expect to see the transportation of accommodation units by heavy vehicle as these units travel on the Sturt Highway to South Australia.

This transportation activity is expected to commence in early June 2025 and will continue until the end of July 2025. Please allow for any delays to your travelling plans during this time.

How we're managing impacts

Traffic management

Temporary traffic changes may be in place to ensure your safety during heavy vehicle movements. Please keep to the sign posted speed limits and drive to the conditions such as slowing down in wet weather and poor visibility.

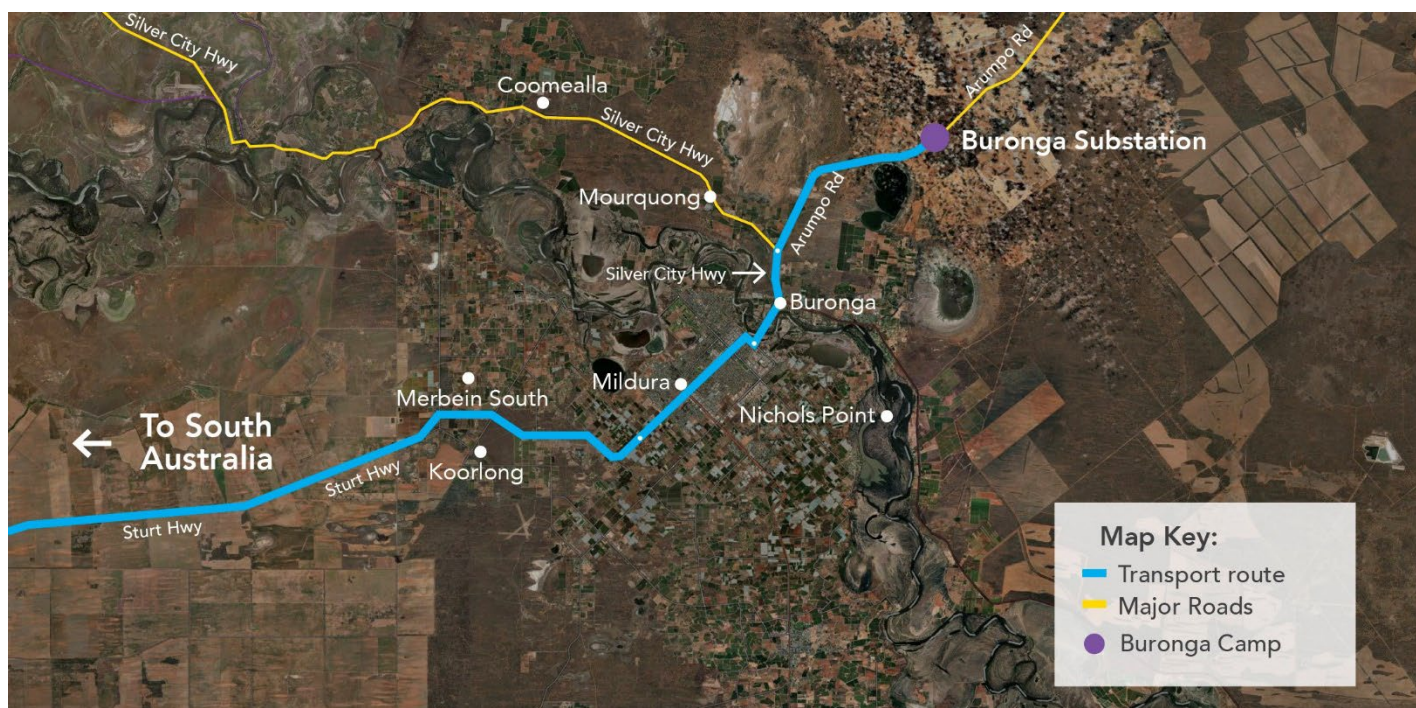

Noise and vibration

Demobilising works at the camp have been identified as having an inaudible noise risk due to the distance of sensitive receivers from the proposed work location.

We will make every effort to minimise impacts by:

- Minimising the number of machines/vehicles to be used
- Ensuring all machinery and vehicles are maintained and serviced
- Turning off machinery and vehicles when not in use
- Fitting equipment with devices to minimise noise
- Using water carts, stabilising stockpiles and reducing speed on unsealed roads to suppress dust
- Monitoring dust, noise and vibration to manage any potential impacts and change our work if required.
