

Elecnor Australia has been contracted by Transgrid to deliver part of EnergyConnect with the construction of 700km of new power lines from the SA border to the regional energy hub of Wagga Wagga. The project will connect the electrical grids of New South Wales, South Australia, and Victoria, improving reliability of our nation's energy supply.

Maintenance activities

The EnergyConnect project team is undertaking scheduled maintenance on the 330kV line from the South Australian border to the Buronga Substation, NSW, between **Saturday 2 May** and **Wednesday 13 May 2026**. As part of these works, we will also be carrying out maintenance work at the Buronga Substation during this period.

Work outside of approved construction hours

The approved hours of work are:

- 7am to 6pm Monday to Friday
- 8am to 1pm Saturdays

Work outside these standard construction hours are scheduled for this activity. This is to ensure these activities are carried out safely and to minimise disruption to the community. Work will take place, weather permitting, Monday to Sunday 7am to 7pm including Public Holidays.

How could this affect you?

Residents of Wentworth Shire Council

Motorists should be aware of additional project vehicles in the area and drive to the conditions as our crews carry out the work required on the transmission line and substation.

Types of plant and equipment being used

The type of plant and equipment you can expect to see includes elevated work platforms (up to 70 metres in height), and trucks moving equipment between sites as well as additional light vehicles.

How we're managing impacts

Traffic and vehicle movements

While no road or lane closures are required, there will be an increase in project-related vehicles during this time. Motorists are encouraged to remain aware of changing conditions and allow additional travel time if required.

Noise and vibration

We will make every effort to minimise impacts by:

- Minimising the number of machines/vehicles to be used
- Ensuring all machinery and vehicles are maintained and serviced
- Turning off machinery and vehicles when not in use
- Fitting equipment with devices to minimise noise
- Using water carts, stabilising stockpiles and reducing speed on unsealed roads to suppress dust
- Monitoring dust, noise and vibration to manage any potential impacts and change our work if required.

Contact Us

Please contact us if you have any questions about the Out of Hours construction works or if you have any questions about the project. We can be contacted via: **Project Community and Stakeholder Engagement Team** on 1800 49 06 66 (free call) or email pec.community@elec.nor.es
